TODAY'S HOST

Michael Chiacos

DIRECTOR OF CLIMATE POLICY
COMMUNITY ENVIRONMENTAL COUNCIL

California is Ditching Fossil Fuels

Path to 100% Clean/Renewables

Electrifying Transportation

Electrifying Buildings

Strong Programs to Help You

Community
Environmental
Council

BOLD CLIMATE ACTION
ACCIÓN CLIMÁTICA AUDAZ

Our Story

1. Drive Less

2. Drive Clean

- New EVs start under \$20,000 for Bolt, Leaf after incentives
- Used EVs start at \$5,000
- Federal \$7,500 new/\$4,000 used tax credit
- New CVRP, 3CE rebates - \$4,000
 - \$10,500 for low/mod income (under \$111k family of 4)
- Used 3CE, PG&E or SCE - \$2,000
 - as much as \$10,000 low/mod income

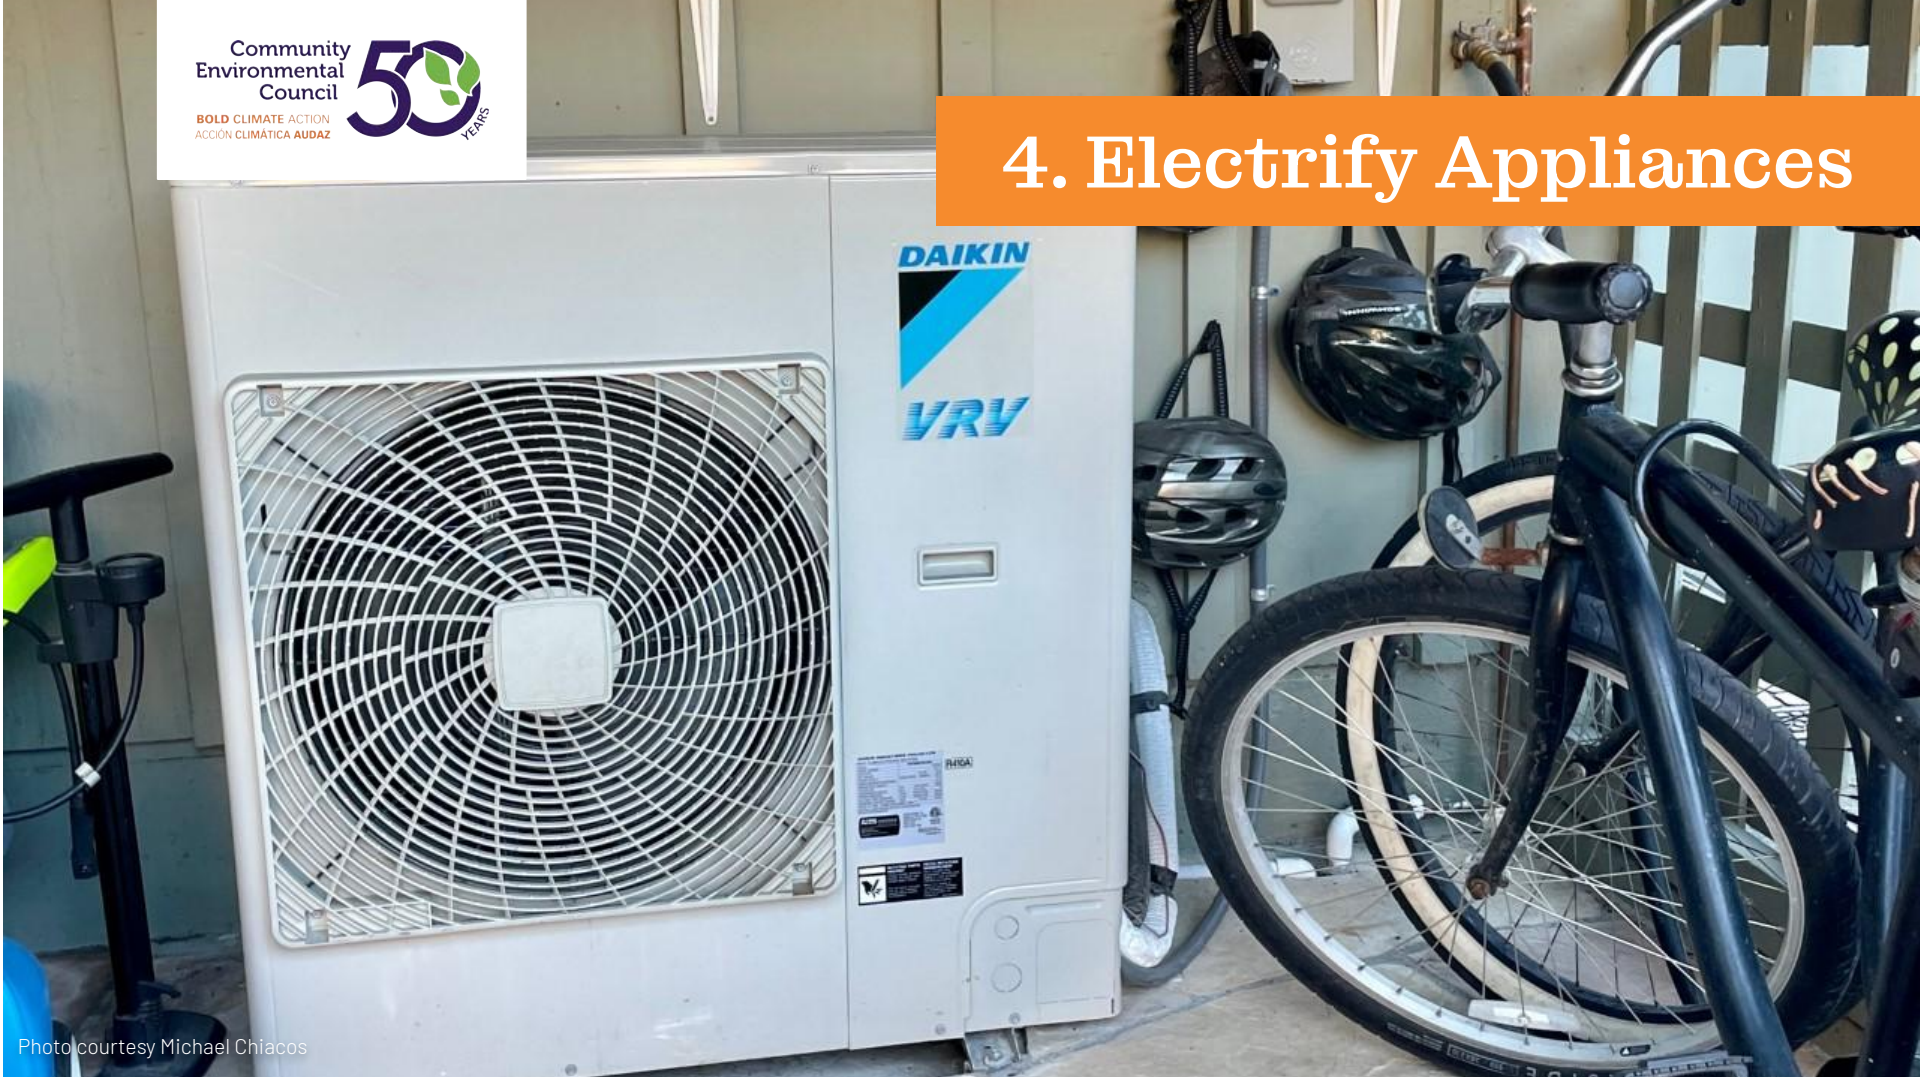

3. Fly Less

Most
carbon-intensive
activity many of
us do

Flying family of
three to New York
= driving gas car
for 5 months

4. Electrify Appliances

5. Go Solar or Choose 100% Renewables

- EVs and heat pumps + solar = faster payback
- NEM 3.0 starting April 13
 - Solar+storage
- Choose 100% renewable rate from your utility

6. Battery Storage

- Expanded 30% tax credit
- Use with solar to help the grid
- Back-up power in rural areas

7. Boost Energy Efficiency

- LED lighting and efficient fridge/appliances
- New tax credit of 30% (up to \$600/project)
- \$3,200/yr (two EE projects + heat pump)
- Insulation/Air Sealing
- Electric panel upgrade
- Energy Star window/skylights/doors

8. Advocate for Rentals

- Solar on Multifamily Affordable Housing (SOMAH)
- 3CREN Multifamily program
- Central Coast Community Energy programs
- EV charging programs

9. Dietary and Lifestyle Changes

- More plant-based meals
 - 10-50x smaller emissions than animal
 - More vegan/vegetarian meals
- Food waste
 - 40% of food is wasted
 - Better food planning
- Food not lawns
- Reduce, re-use, recycle

10. Vote and Take Political Action

ENERGY PORTFOLIO MANAGER
COUNTY OF SANTA BARBARA

ENERGY UPGRADES FOR HOMEOWNERS

April Price

February 16, 2023

3C-REN: Tri-County Regional Energy Network

- Three counties working together to improve energy efficiency in the region
- Services for:
 - **Building Professionals:** industry events, training, and energy code compliance support
 - **Households:** support with home energy upgrades
- Funded by ratepayer dollars that 3C-REN returns to the region

ENERGY
CODE
CONNECT

BUILDING
PERFORMANCE
TRAINING

HOME
ENERGY
SAVINGS

Benefits of Energy Upgrades

Energy Efficiency

- Reduce electricity/natural gas bills
- Enhanced comfort
- Reduce GHG emissions

Electrification

- Improve air quality
- Reduce health risks from fossil fuel combustion
- Reduce fire risk
- Reduce GHG emissions

Programs that make energy
efficiency and electrification
more affordable

How much can I really save?

- State/local incentives and tax credits can stack to total ~\$6,000 to \$9,000 of a ~\$12,000 heat pump project in our region.
- For customers that are on discounted utility rates, or don't speak English as their primary language, **incentives will likely cover the entire cost of the project (SB and SLO Counties).**

Examples at the end!

Single Family Program

- Competitive/discounted pricing available from enrolled contractors
- Especially discounted pricing for "Hard to Reach" customers
- Quality work because contractor payments are tied to performance

Learn More:

3C-REN.org/for-residents#!directory

Eligibility Criteria

- Single-family residential customer (includes mobile/manufactured homes)
- Live within the 3C-REN territory and receive IOU or CCA service
- No added solar within 12 months
- Lived at the home for at least 12 months

Enrolled Contractors

Learn More: 3C-REN.org/for-residents#!directory

How to Participate: Connect with a Contractor

1. Visit **3C-REN.org/for-residents**
2. Complete the interest form

AND/OR

Search for a contractor

3. Complete your energy upgrade project

A screenshot of a web form for 3C-REN. The form is divided into two columns. The left column contains fields for 'First Name', 'Last Name', and 'Street'. The right column contains fields for 'City', 'State/Province', 'Zip', 'Email', and 'Phone'. Below these fields is a section titled 'I am interested in (press cmd or ctrl key to select multiple options):' with a list of options: 'Appliances', 'Insulation', 'Lighting', 'Windows', 'I'm exploring an all-electric home', 'New or tuned up heating and/or cooling system', and 'Other energy-saving upgrade(s)'. To the right of this list is a checkbox labeled 'I'm not a robot' and a CAPTCHA logo. At the bottom right of the form is a blue 'Submit' button.

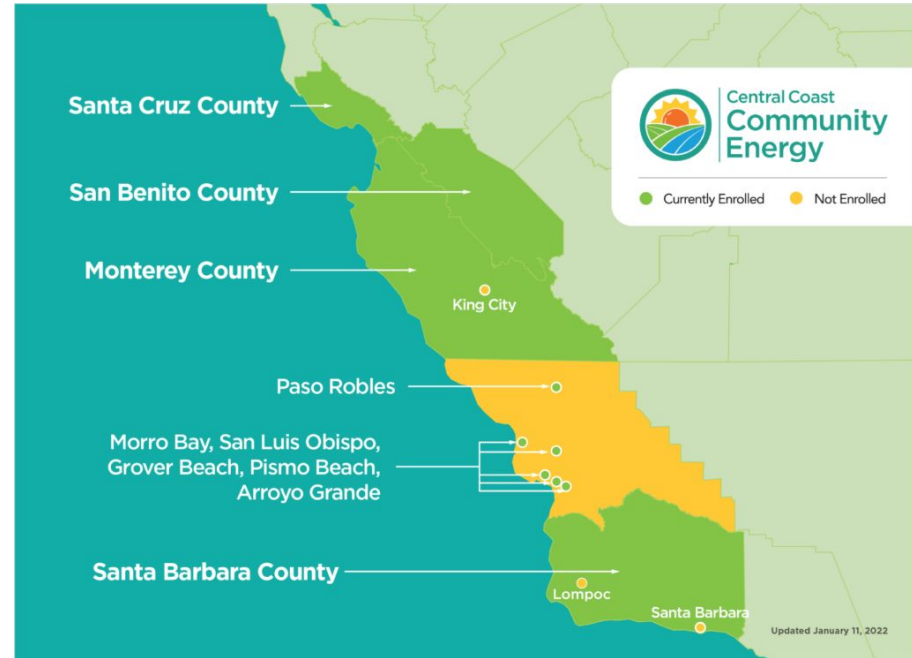

3CE Electrify Your Home

- Receive up to **\$3,800** for Heat Pump Water Heater equipment and installation
 - Receive up to **\$3,500** for Heat Pump HVAC equipment
 - Up to **\$2,000** for electric panel upgrades/replacements
 - **Additional \$1,000 per unit** for CARE/FERA qualified customers
- *All incentives are passed down to you by the contractor

Learn More: 3cenergy.org/electrify-your-home/

Eligibility Criteria

- Single-family homes and multifamily units are eligible
- Live in 3CE's service territory
- Work with a qualified contractor
- Convert a gas water heater or HVAC system to an electric heat pump

TECH Clean California Incentives still available for water heaters

\$3,100 available in SoCalGas territory for heat pump water heater conversions from natural gas.

**Locally most relevant for non-3CE customers

TECH Clean California Incentives HVAC: Returning Soon

Single Family Relaunch Details

Single Family HP HVAC

- Launch **Spring 2023**
- **\$1,000/unit**, max of 2 units per dwelling
- Minimum Efficiency: **TBD**
- Dual fuel systems will be accepted, but only if it is an AHRI matched system with controls to limit furnace operation

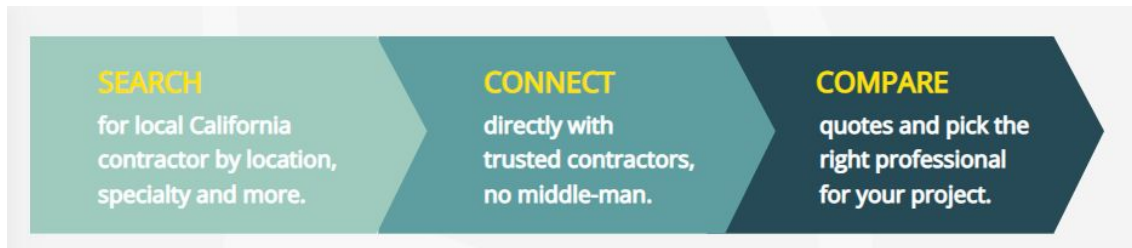

Single Family HPWH

- Launch aligned with SGIP HPWH,
- **TECH will provide gap funding** to fill in geographic regions that SGIP HPWH cannot serve
- TECH team will **educate market and customers about DR requirements** to prepare stakeholders ahead of launch

**Locally most relevant for non-3CE customers

How to Participate in TECH and 3CE's Programs: Connect with a Contractor

1. Work with a contractor listed on **switchison.cleanenergyconnection.org**

OR

Ask your preferred contractor to sign up for TECH Clean California

2. Complete your energy upgrade project and receive either an upfront discount or a post-install rebate

Energy Efficient Home Improvement Tax Credit

Federal Tax Credit (started Jan, 2023, part of the Inflation Reduction Act):

- 30 percent of the cost of energy-efficiency improvement
- Limit of \$2,000 for heat pumps and heat pump water heaters
- Other appliances are subject to a \$600-per-item limit.

More info: energystar.gov/about/federal_tax_credits

**Locally most relevant for non-3CE customers credits

Tax Credit Examples: up to 30 percent of cost

Water Heaters:

- Heat Pump \$2,000 tax credit maximum
- Efficient Natural gas upgrade \$600 tax credit maximum

Insulation

\$1,200 tax credit maximum

The overall total limit for an efficiency tax credit in one year is \$3,200

More info: energystar.gov/about/federal_tax_credits

**Locally most relevant for non-3CE customers credits

Access all programs for huge savings!

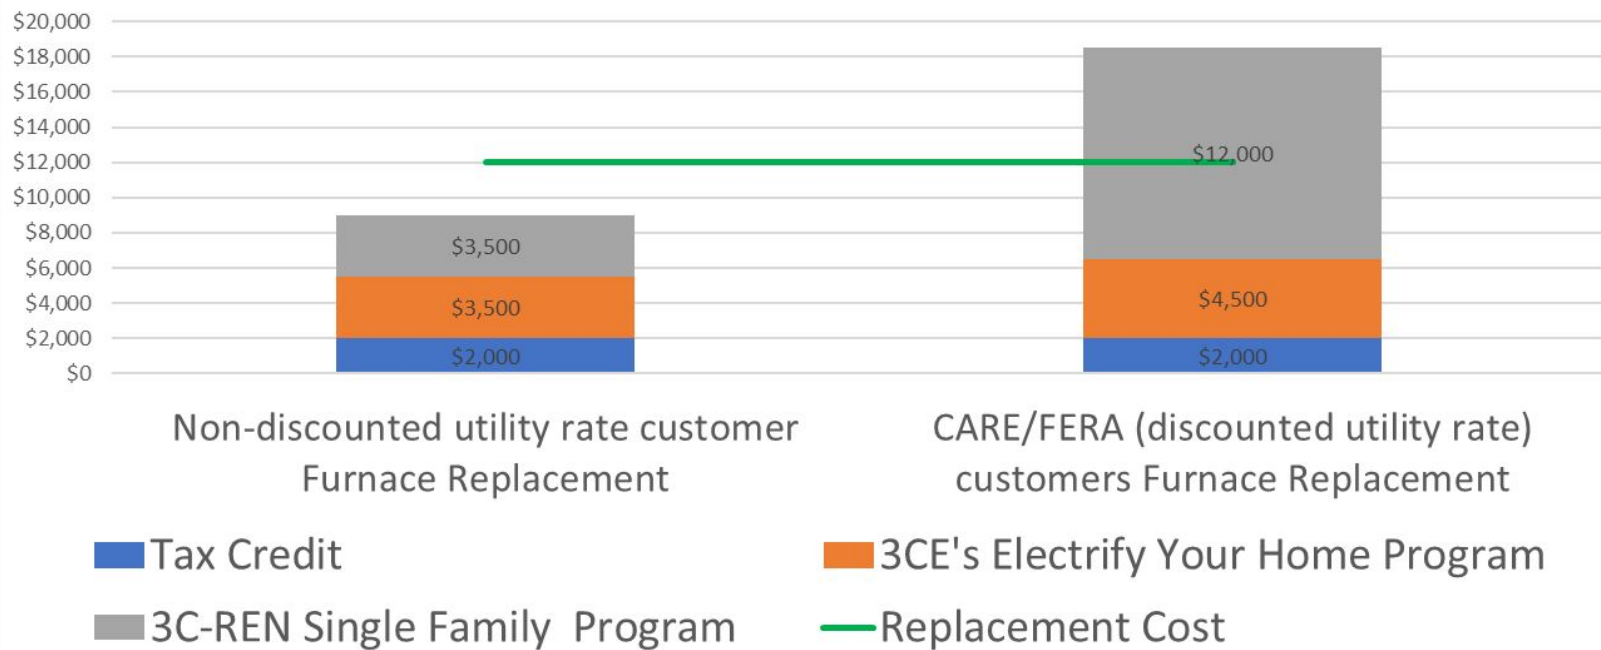

3C-REN's Single Family Program, 3CE's Electrify Your Home program (OR TECH), and Federal Tax Credits can all be applied to your project.

How?

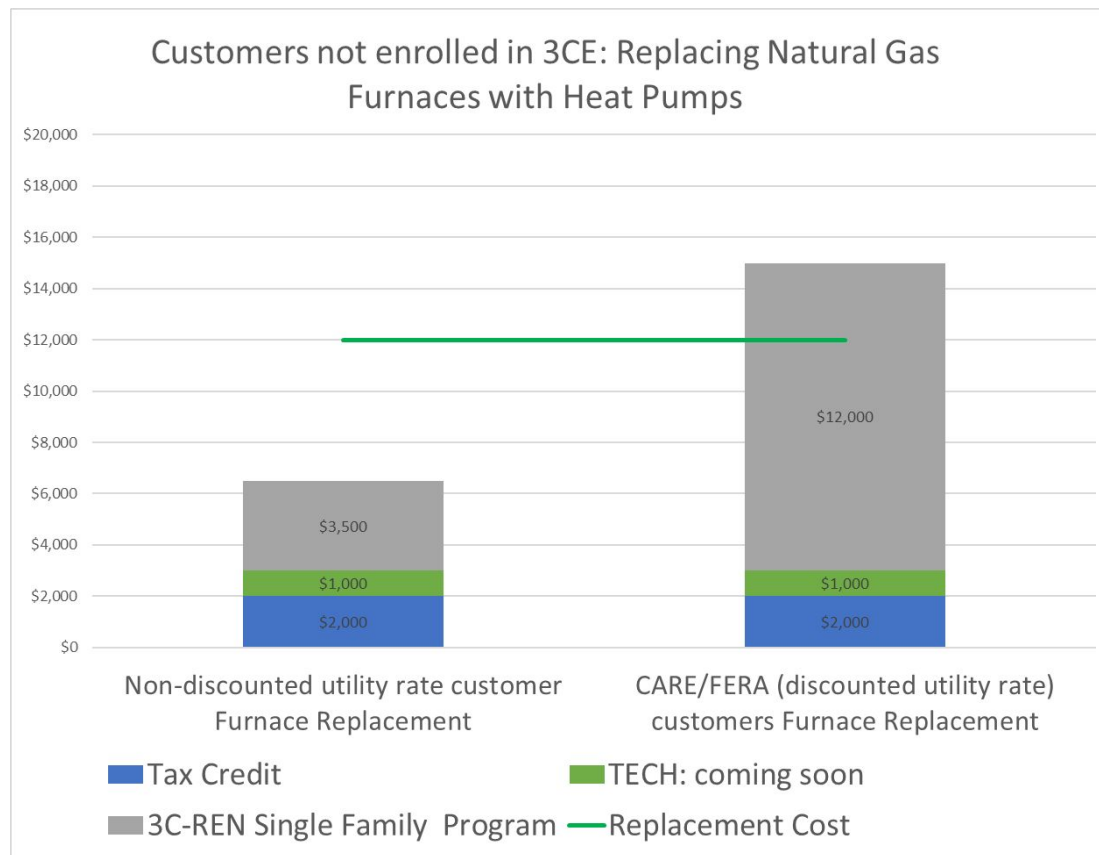

- Make sure your contractor is enrolled in 3C-REN **and** 3CE's/TECH programs. If they're not- tell them and ask them to apply!
- Consult your tax professional

Example

3CE Customers in San Luis Obispo and Santa Barbara Counties Replacing Natural Gas Furnaces with Heat Pumps

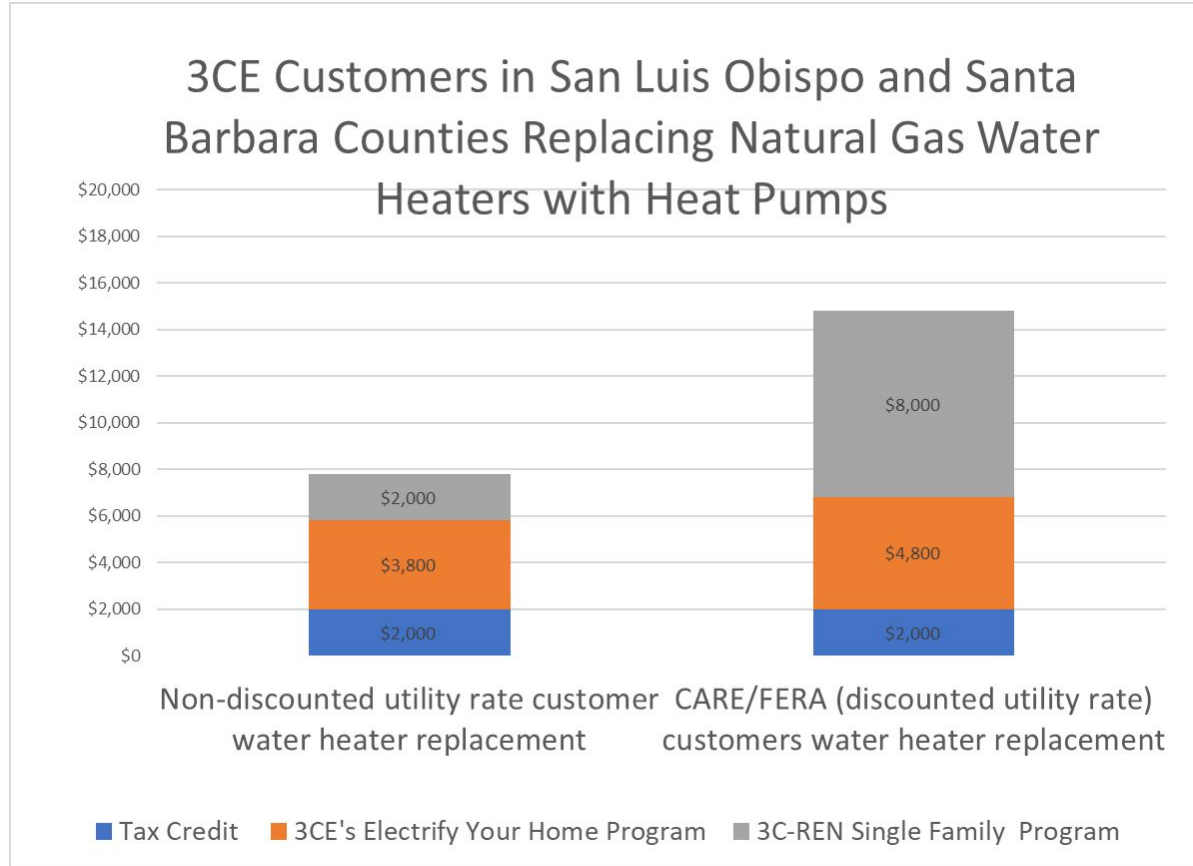

Example

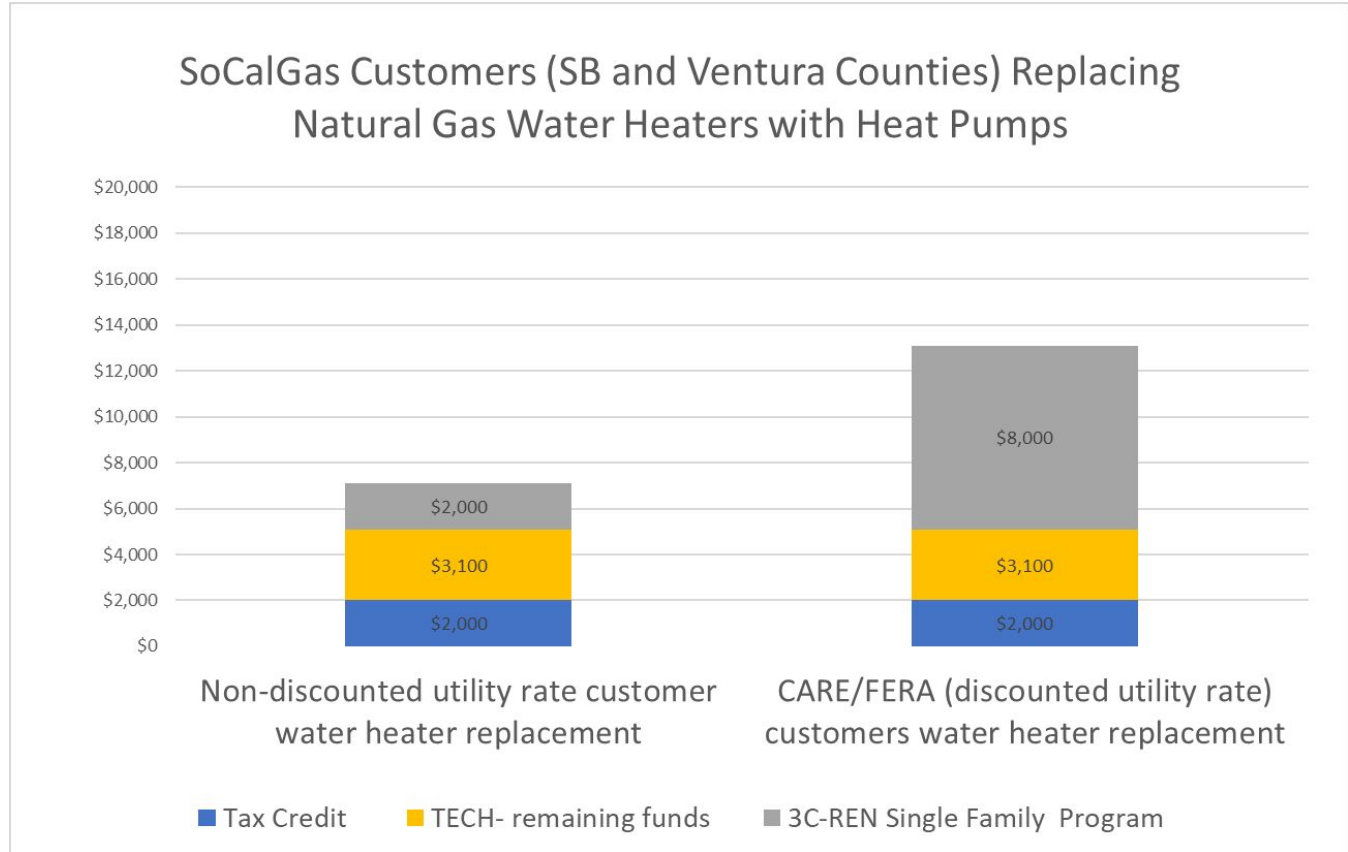

*In Ventura County, residents must live in a designated "Disadvantage Community" and be on the discounted utility rate OR speak a language other than English to access higher incentives

Example

Example

*In Ventura County, residents must live in a designated "Disadvantage Community" and be on the discounted utility rate OR speak a language other than English to access higher incentives

Check out a DIY Home Energy Savings Toolkit from the County Library!

4 Light-Emitting Diodes (LEDs) bulbs

Replace the standard bulbs in your high-use light fixtures with these energy-saving LEDs.

Weatherstripping

Apply weatherstripping around your doors and windows to help seal air gaps. Please return what you don't use.

Outlet Gaskets

Outlets are a hidden source of heat loss—install these gaskets to seal the gaps!

Low-Flow Showerhead

Save water and stay comfortable with this new showerhead.

Rubber bands

Wraps around the pliers to help prevent scratching the aerators or showerhead during installation.

2 Low-Flow Faucet Aerators

Install one (1.0gpm) in your bathroom and one (1.5gpm) in your kitchen to help save water. Will fit most faucets (might not fit some specialty ones).

Water Leak Detection Dye Tablets

Drop in your toilet tank to identify leaks. (Keep out of reach of children—Do not eat!)

Water Flow Rate Bag

Find your true flow with this great rate bag!

Cost and Impact

Buy or Lease an Electric Vehicle

Electric vehicles are much cheaper to operate and maintain than gas cars, and they are fun to drive! They also don't create emissions that cause air pollution. If we all drove EVs, imagine the clean air! And ranges are extending—up to 200 miles or more on an overnight charge. The list of EV benefits goes on! Read more about the perks of EVs below.

Resources

Application

Overview

The Electrify Your Ride Program provides CCCE customers with a “one-stop-shop” for transportation electrification rebates and support. Rebates are available for electric vehicles, Level 2 EV chargers, and EV readiness (electrical work related to charger installation).

Looking to install charging stations on your multi-family property, such as a duplex, townhome, or apartment complex? Please apply on our [Electrify Your Ride Commercial webpage](#).

Why Electrify?

• Environmental and Health Benefits

- In full electric mode, an electric vehicle produces zero tailpipe emissions, dramatically lowering smog and greenhouse gas emissions
- Cleaner cars mean cleaner air and better health
- Reducing emissions, getting more EVs on the road and building more charging stations will increase local and regional adoption rates to meet state and regional climate action goals

• Fuel Costs

- Electric vehicles typically achieve better fuel economy and have lower fuel costs than similar conventional vehicles

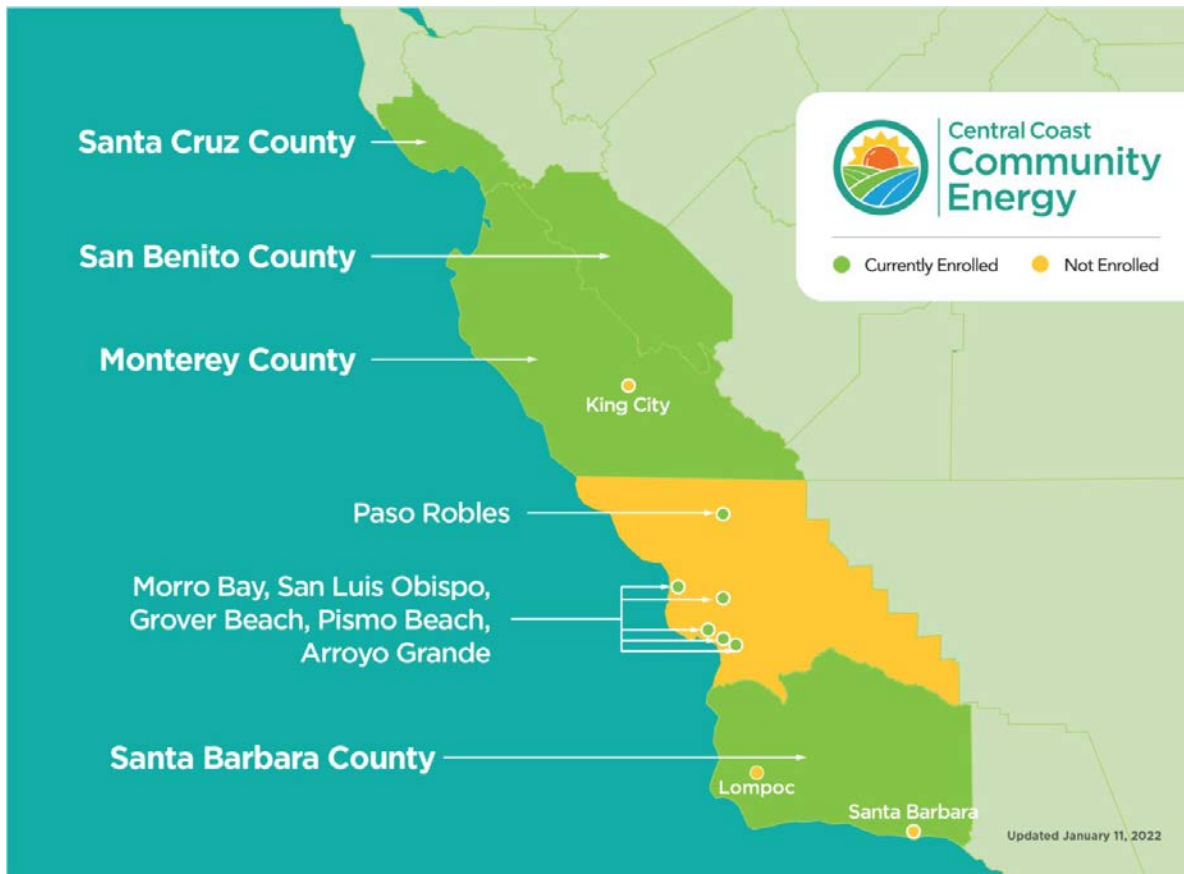

• Maintenance Costs

- Electric motors have far fewer moving parts and never require oil changes, new spark plugs or fuel filters. Regenerative braking also extends the lifespan of brake pads by using the electric motor to decelerate the vehicle.

COMMUNITY WORKSHOP CALENDAR

Monthly Topics

FEB **Home Energy**
Burning fossil fuels for electricity and home heating/cooling is one of the largest sources of greenhouse gas emissions in the U.S. Learn about actions you can take to reduce carbon pollution, save money and improve indoor air quality! Explore programs and incentives for Central Coast residents and connect with community members who want to take climate action together!

MAR **Shift Your Ride**
Our personal vehicles create 24 pounds of carbon pollution for every gallon of gas. Learn more about the many options to reduce your impact from daily travel. From driving less to public transportation to considering an EV, there are many ways to reduce carbon pollution while saving money!

APR **Eat Green & Waste Less**
Say goodbye to throwaway society and lighten the waste in your household! Did you know reducing food waste and eating more plant based meals are two important solutions to climate change? Learn simple and easy tips on reducing food waste and creating climate friendly meals.

MAY **Community Action**
Small actions have a huge impact when we do them together! Be part of the Community Action Challenge by participating in a neighborhood clean-up, volunteering with a non-profit, or organizing a food drive. Learn what we can do as a community to help fight climate change!

JUN **Water Wise**
There are many ways to save water, which also saves energy and money! From filling up the dishwasher or washing machine before you run it to replacing your lawn, every action adds up. Lawns are the biggest outdoor water user for many homes. Replacing them with native flowers or dining areas saves money on your water bill and provides a wonderful outdoor environment for your home!

Sign up and commit to taking one action!

Step 1:

Find your local platform under "Join the Campaign"

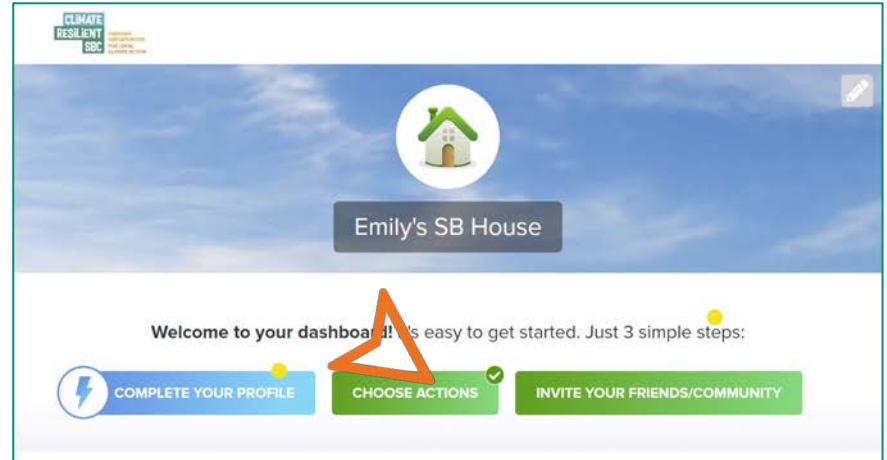

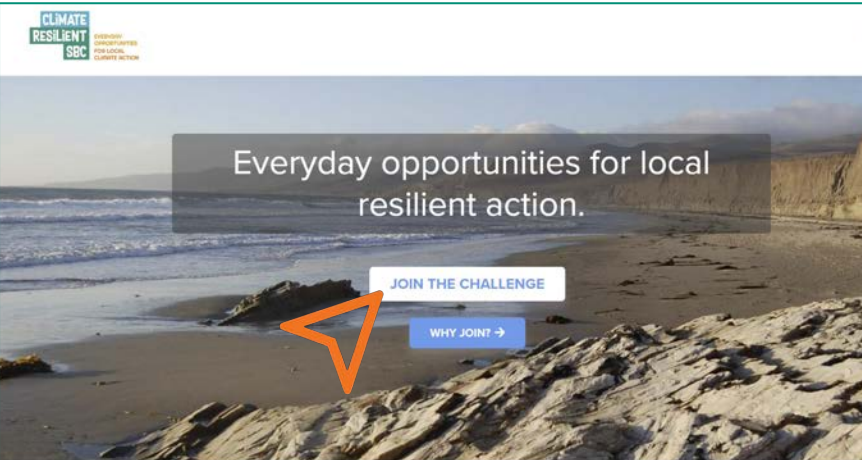

www.resilientcentralcoast.org

Step 2:

On your local platform, click "Join the Challenge" and create an account

Step 3:

Log in and click "Choose Actions" and select one action that you will take this month!
